In the Specification:

Page 7, in the description of FIGs. 8 and 9, please amend as follows:

In Fig.8 is schematically shown the realization of method and device at playing the game in the form of moving objects accidental hit of the space vehicle's surface game fields, in which the outer surface of the space vehicle are used as the game event assessment means and the movable objects randomly moving in cosmic space are used as the game elements, registration of a game event occurrence is being effected when a movable object hits a game field; ~~and~~

Fig. 9 is a flow chart of the method of playing the game in accordance with the rules of roulette or the rules of lottery; and

Fig. 10 is a flowchart of the operational steps of a method of playing the game in accordance with using a random number generator.

Page 20, after line 14, please add the following new paragraph:

With reference to Fig.1, the applied space Generator of Random Numbers (RNG) shows the following: 1 – game elements, flow of micrometeorites in the near Earth space; facility 2 –

spacecraft launched to the orbit of micrometeorites flow; 3a – gaming field in view across the micrometeorites flow; 3a – gaming field in view along the micrometeorites flow; 4 - sensor of collisions with micrometeorites; 5 – numerical identification marker; 6 – clock; 7 - generating element of RNG; 8 - enciphering element of RNG; 9 - transmitting element of RNG (telemetry channel); 10 – ground; 11 - receiving element of RNG; 12 - presenting element of RNG, being display or computer monitor or television receiver or radio receiver.
